understanding baby behaviour

WHY 'SEEING THE BABY' MATTERS...

Seeing the baby matters because behaviour is the baby's language.

When we notice and understand it, we can respond more accurately, more sensitively, and in ways that are truly individual to the baby.

This attuned, responsive care supports healthy brain development, lifelong wellbeing, and helps build a stronger, more secure bond between babies and their caregivers.

Learn more about the remarkable ways babies are born ready to communicate and connect at: www.brazelton.co.uk
